*Throughout Canada and the U.S., the Manderley team works hand-in-hand with golf course architects, designers and superintendents to build and renovate courses that open sooner and perform better.*

Our professional installation teams are the most sought-after experts in North America, laying as much as 100,000 square feet per day. We use specialized, high flotation equipment to ensure that premium turfgrass is installed on time and to perfection.

With all of our projects, we guarantee the following:

- A professional crew who know and respect golf course etiquette
- A commitment to maintain the integrity of the design
- Product and installation warranty

## SOLUTIONS

### Renovation Services

Knowing when to plan your renovation and choosing the most appropriate turfgrass variety will shorten the total project time as well as guarantee the back-to-play date.

We offer the following renovation services:

- **Fairway contouring:** we remove the existing turf, re-grade the surface and install turfgrass sod to the contour design
- **Bunker facing:** using specialized techniques like staking, we install and secure Fine Fescue turfgrass on your bunker facing, regardless of the height of the slope
- **Turfgrass sod wall bunkers:** we build to the original Scottish style seen in the birthplace of the game
- **Tee resurfacing:** to resurface your tees, we remove the existing turf, use laser leveling to establish the proper grade and then install premium turfgrass
- **Fairway resurfacing:** like tee resurfacing, we do the necessary preparation work to get the base just right before adding new turfgrass sod
- **Cart path transitions:** it's a detail but finished cart paths make a statement. We bring your path to grade and install turfgrass for a finished look
- **Driving ranges and target greens:** with its differentiation of colour, ICON™ makes an ideal solution for targets

### Rapid Greens Replacement

Our team of experts has perfected rapid greens resurfacing. As part of the resurfacing process, we use soil-free sod to provide faster root development without soil contamination or layering issues. The result is minimal downtime. Your greens can be playable within 30 days. In fact, with some of our projects, greens are playable within 10 days. Results vary depending on the growing conditions.

*"We sodded four greens in one day and they were in play in 30 days. Overall my experience with Manderley has been great and the service level has been excellent."*

Mark R. Prieur, Golf Course Superintendent,  
Trafalgar Golf and Country Club

### Other Premium Services

Regardless of the size and scope of the project, our team of experts offers years of experience and a commitment to quality. Here is a sampling of the hourly services we offer:

- **Resurfacing:** removal of existing turf and installation of new turfgrass sod
- **Fine grading:** preparation for seed or turfgrass sod, rock and debris removal
- **Emergency repair:** from weather damage, vandalism and chemical spills
- **Minor construction:** reshaping, turfgrass sod wall bunker building
- **Contouring:** redefining fairways

Ask us for our product sheet.

### New Golf Course Construction

With more than 7,000 acres in production in North America alone and almost five decades of experience, Manderley offers consistent quality, purity and dependability throughout the course of your project.

We offer a variety of sodding packages to suit your needs:

- **Basic:** collars, fringes and erosion area
- **Advanced:** basic package plus fairway contouring, tees and greens, and primary rough
- **Comprehensive:** complete sodding of a golf course from tee to green
- **Contract grow:** we will grow the turfgrass sod to your specifications
