

BLUE+FESCUE

TURFGRASS SOD

MANDERLEY BLUE FESCUE SOD BLEND IS GROWN AT A BULLFROGPOWERED® AND NSGA 'GREEN CERTIFIED' PRODUCTION FACILITY. ALL MANDERLEY SOD IS PRODUCED USING ONLY NATURAL IRRIGATION. MANDERLEY FESCUE & BLUE IS SPECIFICALLY DESIGNED FOR THE CLIMATE OF HARDINESS ZONES 4 AND 5.

MANDERLEY BLUE FESCUE REQUIRES LESS MAINTENANCE THAN AN 100% KENTUCKY BLUEGRASS MIX. THE BLEND CONTAINS 45% TWCA QUALIFIED CULTIVARS WHICH SIGNIFICANTLY REDUCES WATER IRRIGATION REQUIREMENTS. THIS BLEND PERFORMS IN FULL-SUN AND PARTIALLY SHADED AREAS (4-6 HOURS OF SUNLIGHT PER DAY) AND IS BEST SUITED FOR MID TO LOW TRAFFIC AREAS.

- 40% - SR 5250 CREEPING RED FESCUE
- 25% - DIVA KENTUCKY BLUEGRASS 
- 15% - SR 2284 KENTUCKY BLUEGRASS
- 10% - APOLLO KENTUCKY BLUEGRASS 
- 10% - VIKING H2O HARD FESCUE 

Appearance	Establishment	Durability	Disease Resistance	Drought Tolerance	Cold Climate	Water Requirement	Maintenance Requirement
	Rapid - 7 to 10 days	Good	Excellent	Excellent	Yes	Up to 30% Less	Low

- GROWN ON ORGANIC-BASED SOIL
- LARGER AND LIGHTER BASE ROLLS THAN MARKET STANDARD
- FASTER TO INSTALL WITH FEWER SEAMS
- AVAILABLE IN 13.5 FT² AND 310 FT² ROLL SIZES

MANDERLEY IS A PROUD PARTNER OF THE TURFGRASS WATER CONSERVATION ALLIANCE.

Manderley Blue Fescue contains 45% TWCA qualified cultivars. The superior genetics help to significantly reduce irrigation requirements, which ensuring top quality turf performance. The main goal of the TWCA program is to combat the rising concern of our depleting water resources. To accomplish this goal, the TWCA program is designed to recognize plants and other live goods products in the lawn and garden industry that provide a clear benefit in water conservation. Products that become TWCA qualified will have successfully met a stringent set of criteria. For more information visit www.tgwca.org
